LRTS Fiftieth Anniversary Index

Volumes 26–50, 1982–2006

Compiled by Edward Swanson

This index to volumes 26–50 of *Library Resources & Technical Services* in general follows the practices used in the index to volumes 1–25, which was published in volume 25, number 4. It is divided into five parts: (1) Part 1, Title Index, which includes titles of articles; (2) Part 2, Author Index, which includes authors of articles, book reviews, letters to the editor, and reports; (3) Part 3, Subject Index, which includes subjects of articles, book reviews, letters to the editor, and reports; (4) Part 4, Book Review Index, a title index to books and other materials reviewed; and (5) Part 5, Resources and Technical Services/Association for Library Collections & Technical Services Index, which includes items by and about RTSD/ALCTS and the sections, committees, etc.

The following principles were followed in compiling the index:

1. Articles are indexed in Part 1 under title, in Part 2 under author(s), and in Part 3 under subject(s). Authors who wrote under two or more names are generally entered under the latest name if that can be determined, with reference from the other(s); authors who used more than one form of the same name are generally entered under the fuller or fullest form. In Part 2 titles are listed under an author's name only if the author wrote more than one article; in such cases some titles have been abbreviated. Articles and notes about individuals are indexed under the person's name in Part 3; pictures of an individual are indexed in Part 3 and are indicated by "*port.*"
2. Reviews of books and other materials are listed in Part 4 under title and are indexed in Part 2 under the name of the author of the review (indicated by "*reviews*") and in Part 3 under the subject(s) of the item reviewed (also indicated by "*reviews*").
3. Letters to the editor are indexed in Part 2 under the name of the author of the letter (indicated by "*letters*"). Letters referring to a specific article in *LRTS* also are indexed in Part 1 under the title of the article referred to; letters not referring to a specific article are indexed in Part 3 under the subject of the letter (both indicated by "*letters*").
4. A feature published during a part of the time covered by this index is the series of "year's work" articles. These are indexed in Part 1 under title, in Part 2 under author(s), and in Part 3 under subject. Because some readers are interested in these as a series, they are also indexed in Part 3 under the heading "Literature reviews," subdivided by the major topics, e.g., Descriptive cataloging, Preservation of library materials.
5. Reports and other information about RTSD and ALCTS, and the sections, committees, etc., are indexed in Part 5 under the name of the division, section, committee, etc. Reports, etc., on a specific topic are also indexed in Part 3 under subject. Reports by individuals are also indexed in Part 2 under the name of the individual, indicated by "*reports.*" The division and section awards are also indexed in Part 5, as well as under the name of the award winner in Part 3.

The following principles govern the arrangement:

1. Entries are filed word by word following the "file-as-spelled" principle. Periods, colons, and dashes are treated as significant punctuation and have been taken into account in the arrangement.
2. Numerals precede alphabetical characters.
3. Acronyms with internal punctuation are filed as initials; those without internal punctuation are filed as words.
4. Subheadings generally are arranged alphabetically under the main headings.
